## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding claims 1-20, there is no prior art of record that teaches the limitation of teaches a semitransparent reflector with transmittivity of 10 to 80%, reflectivity of 20-90, and  $R - R_d$  (where  $R_d$  is diffused reflectivity) of 8 to 30% where the reflector comprises a multi-layered biaxially oriented film comprising base layers A, protective layers B and C provided on base layer A wherein base layer A has flaky pores D and a comprises a thermoplastic resin, and flaky inorganic fine powder and/or and organic filler.

The prior art of record teaches semitransparent reflectors with values overlapping the claimed ranges however fails to disclose the structure of a base layer with protective layer and flaky pores comprising inorganic powder. Hiraishi discloses a stretched polymer film that has a similar structure however does not disclose biaxial stretching nor does it disclose the particular reflectance transmittance and  $R - R_d$  ranged as prescribed by the claim therefore, it would not have been obvious to combine the two references as it is not disclosed whether these values can be obtained as Hiraishi does not disclose T, R and  $R - R_d$  values similar to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
